Breastfeeding: Best for Holistic Development of Children. Breastfeeding is Nature's full proof way of feeding the children by all female mammals including the humans. To the newborn it is best gift for survival, growth and development that also benefits the lactating mothers. Breastfeeding mothers are at lower risk of breast or ovarian cancer, diabetes mellitus, heart disease, or high blood pressure. As a lead world purveyor of child health, UNICEF in its recent release 'Feeding Your Baby: 6-12 Months' (Feeding your baby: 6–12 months) has provided valuable educational tips for best nurturing the breastfed and non-breastfed child. Further, breastfeeding promotes parent-infant bonding, so vital for holistic development of children. Considering its immense benefits, breastfeeding week (1-7 August) is celebrated and promoted worldwide by the WABA (World Alliance for Breastfeeding Action), WHO (World Health Organization) and UNICEF (United Nations International Children's Emergency Fund). This year's theme is, Step up for Breastfeeding, Educate and Support. The idea is, to encourage mother to breastfeed their baby exclusively for first six

months in order to get the incredible health benefits, to fulfill the all vital nutrients, to encourage mother for the healthy growth and development of their child, to guard them from the lethal health problems and diseases including neonatal jaundice, pneumonia, cholera and many more. In India, Breastfeeding Promotion Network of India (BPNI), a notified child welfare NGO promotes and supports breastfeeding and appropriate complementary feeding of infants & young children.

Recognising that nurses as "important members of health care team, play a pivotal role in collaborating and implementing the Baby-Friendly Hospital Initiative (BFHI) policy of quality infant and mother care, the TNAI emphasises the promotion of breastfeeding as a key strategy for child survival, as well as reproductive health". The Position Statement of TNAI also "advocates focusing on training in correct breastfeeding practices which includes the re-establishment of a breastfeeding culture".

The TNAI's National Executive Committee Meets at Vaikom (Kerala)

The 107th meeting of the National Executive Committee (EC) of TNAI was conducted on 22-23 July 2022 at Kalathil Lake Resort, Vaikom (Kerala). Twenty-five EC members from 13 States attended the meeting. It was presided over by Prof (Dr) Roy K George, National President of TNAI. Various issues related to growth of profession and Association were taken up for discussion in the meeting.

The date and venue for the forthcoming TNAI Biennial Conference viz. Kalakshetra Auditorium (Panjabari area) in Guwahati (Assam) during 30-31 January 2022, was discussed and announced. Considering the unsatisfactory working conditions of nurses working in non-government sector, the EC members have decided that writ petitions to this intent be filed in the respective States across the country. Considering that many TNAI State branches do not have their own premises, it was agreed that all State/UT should endeavour to purchase land in a phased manner so as to expand and strengthen their activities.

The EC members desired that the Indian Nursing Council may be approached to consider changing the nomenclature of BSc Nursing to BSN (i.e. Bachelor of Science in Nursing).

The contribution of Nurses during pandemic Covid has been universally acknowledged, some of them even lost their life in bringing relief to the affected. With this reality in view, the EC suggested to build a Covid Memorial Wall at TNAI's Greater Noida campus as a mark of honour to the Covid martyrs.

With TNAI in its role of recruitment agency for nurses abroad and considering that USA looks forward to nurses from India, the EC deliberated and approved that collaboration with concerned organisations may be made for recruitment of nurses from India to the USA.

As a move to invigorate its presence in Asia region, the EC also decided that a half day virtual conference be organised for members of CNMF Asia region. The meeting adjourned with thanks to the chair.

After welcome address, there was orientation to TNAI and SNAI and briefing on TNAI's role as recruitment agency. क्यों जरूरी है मच्छरों से बचाव

दुनिया के अधिकांश इलाकों में पाया जाने वाला नन्हां सा मच्छर, विशेषकर बरसात में, स्वास्थ्यकर्मियों और डाक्टरों के लिए चुनौती बन जाता है। इसके काटने से मलेरिया, डेंगू, चिकुनगुनिया, जीका वायरस, येला फीवर, फिलैरिएसिस, वैस्ट नाइ वायरस जैसी भयंकर बीमारियां हो सकती हैं। संक्रमित मच्छर के काटने से प्रायः हल्के या मध्यम कोटि की तो कभी गंभीर बीमारी हो सकती है। एक कड़वा सच यह है कि अकेले मलेरिया से विश्व में प्रतिवर्ष ७.८१ लाख व्यक्ति जान गंवा देते हैं।

मलेरिया से निजात दिलाने में ब्रिटिश चिकित्सक रोनाल्ड रॉस की ऐतिहासिक भूमिका रही। उन्होंने २० अगस्त १९०२ को मादा मच्छर के काटने मलेरिया होने की खोज की, इसी निमित्त उन्हें मेडिसिन में नोबल पुरस्कार से नवाजा गया। फलस्वरूप चिकित्सकों के लिए मलेरिया की जानकारी, पहचान, और इसके इलाज का मार्ग सहज हो गया। उनकी स्मृति में २० अगस्त का दिन विश्व मच्छर दिवस के रूप में मनाया जाता है।

मच्छर अपने शिकार खोज लेते हैं: शारीरिक ऊष्मा, गंध आदि के जरिए मच्छर मनुष्यों तथा अन्य जीवों द्वारा सांस से उत्सर्जित कार्बन डाईऑक्साइड की ओर आकृष्ट होते हैं। गहरे रंग के करीब वे जल्दी आते हैं। खड़े पानी में मादाएं अंडे देती हैं। अतः बरसात में मच्छरों से बचने की विशेष तौर पर जरूरी रहता है। नर मादा तो फूल-पौधों के रस से काम चला लेते हैं किंतु मादाओं को अंडे देने के लिए रक्त की आवश्यकता रहती है।
