

TNAI BULLETIN

The Year Ends with New Hopes for 2023

With the dates of forthcoming TNAI 77th National Conference in Guwahati (Assam) nearing (on 30 & 31 January 2023), we are endeavouring our best that the essential facilities for participants are available despite organisers' and our limitations. The conduct of Conference in person after a long gap makes this conference a thrilling one. It shall be a great opportunity to glimpse into this relatively little explored wonderful landscape that North East is. We are sure, the Guwahati Conference shall enrich one and all the participants more than academic knowledge and skills.

TNAI Honours the National Florence Nightingale Awardees: Lending support to the National Florence Nightingale Awardees 2020 & 2021, on 8 November 2022, the Trained Nurses Association of India felicitated the recipients of National Florence Nightingale Awards by bestowing shields and certificates. The programme held in open lawn of TNAI Hqrs was graced, besides Dr Deepika Cecil Khakha, Nursing Advisor to Govt of India, Prof (Dr) Roy K George, the National President TNAI, Mrs Achala, ADG Nursing, Mrs Satish Chawla (former President TNAI), Prof (Dr) Bimla Kapoor (Vice President North Region TNAI), Ms Jaiwanti P Dhaulta (former Secretary-General TNAI), INC representatives, senior members of TNAI and executive members from State Branches, among others.

Facilities for civil services aspirants: In keeping with aspirations of getting into civil services and to encourage such TNAI members, the National EC/ Council has approved a plan for part-funding of coaching fee for Indian Civil Services exam, besides free stay in New Delhi for up to six months. The interested members may apply in the format given in back (October 2022) issue of TNAI Bulletin.

World AIDS Day observed yearly on 1 December, seeks to raise awareness about the AIDS pandemic caused by the spread of HIV infection. HIV, a precursor to AIDS stands for the Human Immunodeficiency Virus. It is a virus that attacks the body's immune system i.e. the body's defence against diseases. It can be passed on through infected bodily fluids, most common being unsafe sex or by sharing infected syringes, needles, or injectables. UNAIDS data from on the global HIV response reveals that during the last two years of COVID-19 and other global crises, progress against the HIV pandemic has faltered, resources shrunk, and millions of lives are at risk.

World Diabetes Day: Diabetes, a progressive disorder that leads to serious complications carrying additional costs to the family, community, and healthcare system, is one of the global health emergencies of this century, and 9th leading causes of mortality together with cardiovascular disease (CVD), respiratory disease, and cancer. The burden of diabetes is high and increasing globally, and in developing economies like India, mainly fuelled by the growing prevalence of overweight, obesity and unhealthy lifestyles. An estimated 231.9 million (one in two) of adults with diabetes remain undiagnosed worldwide indicating an urgency to undertake

educational programmes at grass roots level. Governments and civil society also have a role in creating awareness and making healthy foods an option for everyone regardless of socioeconomic status. Diabetes advisory: maintaining a healthy weight, stay physically active, and eat healthy foods.

We wish the TNAI National and State Office bearers of TNAI for providing valuable guidance in functioning of TNAI and also our esteemed readers for their loyalty.

We wish and believe, closing of the year shall put to rest the clouds of Coronavirus or other uncertainties and imbue us with renewed vigour to complete the tasks at hand with superior skills and wisdom.

Evelyn P Kannan

सार्वजनीन स्वास्थ्य कवरेज क्यों, और कैसे

स्वास्थ्य मनुष्य की सबसे बड़ी पूंजी है। स्वस्थ रहेंगे तभी सभी कार्य बेहतर ढंग से निष्पादित करने में समर्थ होंगे, और तभी परिजनों, समाज और राष्ट्र के विकास में योगदान दे सकेंगे। स्वस्थ रहने के लिए पहले तो स्वास्थ्य और पोषण का बुनियादी ज्ञान आवश्यक है। उसी के साथ यह भी ध्यान रहे कि अनेक व्यापक और संक्रामक बीमारियों से बचाव के लिए जरूरी दिशा-निर्देशों की अनुपालना की जाए।

देश के नागरिकों को नीरोग रखने के लिए जरूरी है कि उपलब्ध स्वास्थ्य सेवाएं और सुविधाएं सभी की पहुंच में हों। बहुत से विकासशील देशों का दुर्भाग्य है कि खासी संख्या में वहां के नागरिक इसलिए दम तोड़ देते हैं कि समय पर उन्हें स्वास्थ्य सुविधा पहुंचाई नहीं जा सकी। इसके अनेक कारण होते हैं। पहला स्वास्थ्य जागरूकता का अभाव; दूसरा, लक्षणों के आधार पर बीमारी की पहचान करने वाला नजदीक में नहीं था, या उससे संपर्क नहीं साधा जा सका। तीसरा जरूरी दवा या जांच सुविधा नजदीक में थी ही नहीं, थी भी तो रोगी के पास सुविधा प्राप्त करने के लिए पैसे नहीं थे।

बुनियादी तथा आवश्यक स्वास्थ्य सुविधाओं के अभाव में किसी की जान को जोखिम न हो, यह सुनिश्चित करने की दृष्टि से संयुक्त राष्ट्र प्रतिवर्ष 92 दिसंबर का दिन अंतर्राष्ट्रीय सार्वजनीन स्वास्थ्य कवरेज दिवस के रूप में मनाता है। वर्ष 2019 में स्वीकृति के बाद संयुक्त राष्ट्र के तत्वाधान में, इस दिवस के कार्यक्रमों का उद्देश्य रहता है जिस किसी को जिस रूप में स्वास्थ्य सेवा की नितांत आवश्यकता हो वह उसे मुहैया कराई ही जानी चाहिए, वित्त के अभाव में उसके स्वास्थ्य से समझौता नहीं हो। प्रदान की जाने वाली सुविधाओं में रोकथाम, उपचार, पुनर्वास व स्वास्थ्य संवर्धन, सभी पक्ष सम्मिलित हैं। वर्ष 2022 के लिए स्वास्थ्य कवरेज दिवस का थीम है, “सभी की आकांक्षाओं के अनुसार भविष्य का निर्माण: सभी स्वस्थ रहें।”

हालांकि 2000 से 2019 तक दो दशकों में वेस्टर्न पेंसिफिक अंचल में हेल्थ सूचकांक में 48 से 80 की बढ़त दर्ज की गई तथापि अनेक देशों में सेवाओं की कवरेज एकसार नहीं रही और जनसमुदायों को, विशेषकर संवेदनशील वर्गों को वित्तीय कठिनाइयों से जूझना पड़ा।

यह देखते हुए कि विश्व में आधी से अधिक लोगों को हेल्थ कवरेज सुलभ नहीं है, करीब 90 करोड़ व्यक्तियों के पास ‘अत्यधिक गरीबी’ के कारण स्वास्थ्य सेवा हासिल करने के लिए धन नहीं है, सदस्य राष्ट्रों की सरकारों से आह्वान किया गया है कि वे हेल्थ कवरेज के लिए वित्तीय साधन सृजित करें। आखिर, सभी स्वस्थ रहेंगे तभी विश्व समुदाय का कल्याण संभव होगा।
